**PELLCAN**  
*Airgun Pellet Containers*

Designed for the storage and transport of your airgun pellets, Pelican containers are used by many Olympic shooters for match air rifle events.

All containers feature interchangeable badges to indicate the calibre being stored, airtight O-ring seals and an anodised finish to resist wear.

Six colours and three sizes – 3.9in, 2.9in and 1.9in – are available.

**CARSON OPTICAL**  
*3D Series Binoculars*

Carson's newly instated 3D Series binoculars are phase-corrected to ensure the user views a bright and sharp image.

The lenses feature a high-definition optical coating technology that is said to increase the light-gathering properties of the device significantly, giving clearer, brighter images in low-light conditions.

Precisely placed thumb grooves and improved ergonomics ensure that this product is comfortable to hold.

**MAGNUM RESEARCH**  
*Mark XIX Desert Eagle .50AE Pistols*

The Desert Eagle from Magnum Research is a classic handgun that's been used in many Hollywood blockbusters.

The Mark XIX Desert Eagle .50AE pistols are convertible to .44 magnum by simply switching the barrel and magazine, which can be done in seconds! For converting to the .357 magnum you need to switch the bolt assembly, barrel and magazine, which takes a few minutes.
